Windows/MacOS/Linux
Excel

Experience

2018 – Present
Program Coordinator
Procedure Coordinator • Seattle Children's Hospital

- Founded the Apheresis department with a team of directors, physicians, nurses, and quality managers.
- Mapped and revised the provider consult workflow, procedure coordination, and insurance authorization processes.
- Brainstormed and implemented collection of operational metrics that are reported at multiple levels of the Quality team's hierarchy.
- Architected an Access database for tracking operational metrics for the Apheresis department.
- Initiated and facilitated the implementation of the registration process for the Dialysis Unit: planning and coordinating with other departments, educating families about the changes verbally and in writing, and following through with support for new patients.
- Developed Excel spreadsheets to monitor patient attendance which are used by the entire dialysis treatment team including doctors, nurses, nutritionists, social workers, and administrators.
- Trained my supervisors in the use of Excel.
- Created a report in Epic, and instructional job aids, to allow the nurses to determine patient arrival status.
- Translated a flowchart for patient medication into an Excel spreadsheet to reduce error.

2013 - Present
Webmaster

- plasmafiles.com (in development) – Node.js, Express.js, React
- joshfogus.com – Node.js, Express.js, vanilla JavaScript
- crazylegsraceseries.info – Gulp, Pug/Jade, Sass, Python
- aimfabrication.com (formerly) – PHP, vanilla JavaScript

2014 - 2015
Consumer Back Office Representative • Parker Staffing at Nintendo of America

- Investigated over 10,000 consumer requests to determine ownership of products and accounts, develop an appropriate course of action, and resolve the requests.
